JOURNAL OF MATHEMATICAL AND PHYSICAL SCIENCES

A Journal of the Indian Institute of Technology, Madras

VOLUME 9 1975

Published by
Prof. S. Sampath for the Indian Institute of Technology, Madras, India

Printed in India at De Aark Printers, I.I.T., Madras-36

Journal of Mathematical and Physical Sciences

CONTENTS TO VOLUME 9

Number 1, February 1975

On plane waves in asymmetric magneto-thermo-elasticity, D. S. Chandrasekharaiah ... 1

A note on an integral inequality, B. G. Pachpatte ... 11

Torsion of a sectorially composite circular cylindrical beam by a potential method involving use of Green's function, B. Ghosh ... 15

Finite dam with deterministic input, S. K. Srinivasan & S. Kalpakam ... 31

Couette flow over a naturally permeable bed, B. M. Rajasekhara, N. Rudraiah & B. K. Ramiah ... 49

On the stability of non-homogeneous rotatory Couette flow under gravity, Mihir B. Banerjee, G. K. Pradhan & R. K. Jain ... 67

A note on collectively semi-compact operators in locally convex spaces, M. V. Deshpande ... 71

Minimally nonouterplanar graph and its compliment, Veerabhadra, R. Kulli. ... 77

Quadruple series equations involving generalised Laguerre polynomials, A. P. Dwivedi & T. N. Trivedi ... 83

Number 2, April 1975

Rayleigh waves over a thermo-elastic half-space with a slightly curved free surface, K. S. Harinath ... 93

Stability of generalized predictor corrector methods, Satteluri R. K. Iyengar ... 106

Forced vibration of laminated composite cylindrical shells, C. T. Sun and Patrick W. Sun ... 111

On steady three dimensional circulation preserving flows in a gas, E. R. Suryanarayan ... 135

Magneto-elastic interactions in non-magnetic materials, C. M. Purushotham ... 143

An integral invariant in inviscid fluid flow, A. Thyagaraja ... 161

On the sphere theorems for porous media, St. I. Gheorghitza ... 165

Boundedness and asymptotic behavior of solutions of second order integrodifferential equations, B. G. Pachpatte ... 171

A note on optimal stiffly stable methods for ordinary differential equations, C. Prabhakara Rao & Satteluri R. K. Iyengar ... 177

Rectilinear anisentropic flow of a gas, C. N. Kaul ... 185

Errata : Remarks on some fixed-point theorems related to Banach's contraction principle, P. V. Subrahmanyam ... 193

Number 3, June 1975

Some oscillatory properties of fourth order ordinary homogeneous differential equations, Abdelali Benharbit ... 197

Recent development in the mathematical theory of Korteweg-deVries equation, Phoolan Prasad & P. L. Sachdev ... 203

A note on Chebyshev inequality and random differential equations, K Gopalsamy ... 245

On the extension of the point groups, T. S. G. Krishnamurty and V. Appalanarasimhan ... 253

On the unsteady hydromagnetic flow due to a rotating disk, I. Pop ... 259

Heat transfer in steady rotatory flow of visco-elastic liquid between two coaxial circular cylinders, S. P. Mishra and Jyotirmoy Sinha Roy ... 275

Finite flexure of an initially curved cuboid under non-uniform temperature distribution, K. L. Arora ... 289

On a natural cell structure, Mihir B. Banerjee and I. Banerjee ... 299

A negative energy relativistic wave equation, R. Jagannathan & H. N. V. Dutt ... 301

Number 4, August 1975

Some convergence theorems of certain linear stochastic models of autoregressive nature, K. N. Venkataraman ... 305

Axisymmetric free convection from a rotating disk, A. C. Srivastava and R. C. Bhattacharjee ... 333

Irreducible representations of double space groups, Krishna K. Dayanidhi ... 347

A note on wave reflection problems in linear thermoelasticity, C. E. Beevers and J. Bree ... 355

Two fast convergent modifications to Muller's method, S. N. Narahari Pandit, K. S. Sarma and N. Srinivasacharyulu ... 363

Added mass of bodies in terms of singularities, K. M. Hegde ... 371

A note on coarse-graining in statistical mechanics, C. G. Chakrabarti ... 381

No-slip images in a sphere, S. D. Nigam and V. Srinivasan ... 389

An exact solution of Navier-Stokes equations, K. Swaminathan ... 400

Number 5, October 1975

On an integral inequality of Gronwall-Bellman, B. G. Pachpatte ... 405

On zeros of solutions of a second order delay differential equation, R. S. Dahiya ... 417

On the nonoscillation of integro-differential difference equation of first order, Bhagat Singh ... 423

Stress distribution for a pattern of four line cracks under variable pressure, S. C. Das and S. N. Poddar ... 441

Quadruple trigonometrical integral equations and its application to electrostatics, B. M. Singh ... 459

Optimal rules for the numerical integration of periodic analytic functions, Veena Kaul ... 471

The effective viscosity of a dilute suspension of dipolar fluid droplets in a viscous fluid, V. Srinivasan, A. Avudainayagam and S. D. Nigam ... 483

Number 6, December 1975

Generalized plane wave solutions of Einstein-Maxwell equations in the presence of null currents and null fluids, T. Singh ... 499

MHD thermohaline convection in a rotating fluid, S. Narasimha Murthy and R. K. Prabhakar Ram ... 507

Perturbation analysis of a certain singular integral equation, S. R. Majumdar ... 517

Stability and asymptotic stability behavior of functional integro-differential equations, B. G. Pachpatte ... 535

On an extension of Rayleigh criterion, H.S. Acharya and R.K. Jain ... 543

On the solutions of certain fourth order quasilinear differential equations, W. E. Taylor, Jr. ... 551

Stokes flow past a non-homogeneous porous spherical shell with velocity slip, Om Prakash and S. C. Rajvanshi ... 561

On the plane motion through inhomogeneous porous layers of the second type, St. I. Gheorghitza ... 571
